NERVOUS DEBILITY,

Liver, Lung and Kidney Disease.

The first greatest successes I had with Kaskine were in chills and fever, malaria, nervous debility, rheumatism, dyspepsia and liver diseases, and I considered at that time it was undoubtedly the best medicine ever discovered, but it was even then unfamiliar with its really wonderful powers in ouring all the other germ diseases and disorders, particularly where the blood had become diseased or impoverished and the digestion impaired; strictly speaking, Kaskine is the only blood purifier we have; I used it also very largely with unfailing success in all diseases peculiar to women and children: in over three hundred cases I have cured there has never been the slightest bad effect following its use, and it is far superior to any tonic or nerve medicine ever known to the medical profession.
